#### Ice Vermin

**Cable Crawler**

**Sea Spider**

### Cable Crawler

This bizarre creature makes its home in the cables that overhang Le Matra, preying upon other striding fish and small birds. It possesses two sharp claws to slice through cables, along with a natural ability to unleash blasts that cover the tracks of its enemies and cause damage. Cable Crawler's two legs in the dark and prefer to hunt by night. Build your own using parts from Toy Hordika Valana (3756) and Toy Hordika Venuva (3758).

### Sea Spider

This arachnid is actually an enigmatic creature of the sea and is the only known natural predator of the Vianak. While not large enough to pose a threat to a Vianak pre-emption, the four legs of a sea spider are able to launch spines that strike a foe down to a more manageable size. Sea Spider spines can then be used as a temporary shield until such time as the hunter is ready to feed. Sea Spiders do not hunt in groups and are actually hostile to each other. Construct a Sea Spider using parts from Toy Hordika Makana (3737) and Toy Hordika Naja (3740).

## Instructions

### You'll need:

- The blue Dump Truck and yellow Excavator tokens (below)
- One (1) LEGO 2x4 brick
- Six (6) assorted LEGO bricks per player

### Set Up

Carefully cut out the Dump Truck and Excavator tokens. Place them on the matching START spaces. Place six bricks for each player in the Brickyard at the center.

### Game Play

To win, you must win your TECHNIC vehicle around the board, enter the former Brickyard entrance, collect bricks, and transport them back to your Construction Site. You can only make one collection from the Brickyard each time you circle the board. (You may have to make several trips!)

You must always move in the direction indicated by the arrows and follow any instructions that appear on the spaces where your token lands. If you land by exact count, or your opponent's vehicle, you can place any bricks they are carrying on your own vehicle and send them back to their START space. The first to transport six bricks to their Construction Site wins!

**Ready to play!** Choose your token, decide who will take the first turn, then roll the 2nd LEGO brick and move your token as indicated.

KNIGHTS KINGDOM

And **ROCK** Knight is a coward!

Not long ago the evil Viceroy took over Morcia. But thanks to four brave knights - Sir Jayko, Sir Dango, Sir Bartles and Sir Robbers - he was captured and locked up in a castle dungeon.

Now, don't think so faintly the strong. You will have to try harder than that!

Jump about all you like, Robbers. I'll still win in the end!

Tell me Dango the Wing Lord is Sir Jayko?

His training at the school of Orkus seems to be working well!

Residence of the Viceroy of Orkus

And to think this used to be a challenge!

Good work, young Jayko. Your skills have improved a great deal.

So how did I do that time, Guardian?

LATER

How can we help, Your Majesty?

What's this?

Good luck Sir Jayko!

It's a message from the King. I must go back to Morea.

Great Knight, there is a warning from the Book of Morea...

"Lord Vladek has returned, more powerful than ever! He has built a huge Dark Fortress with his new army of Elite Shadow Knights!"

"The Book of Morcus warns he plans to attack in just 5 days!"

"Yes, Sir Dango, Sir Roscoe, Sir Santos and Sir Jackal. Morcus needs you!"

The magic in Heart of the Shield of Ages will give you greater armour, shields and swords!

You must find this Dark Fortress and lower its drawbridge before dawn on the fifth day!

"I will then arrive with our own huge army!"

"We must capture the Dark Fortress to save the Kingdom!"
